PRESTO-TAP NEVER BREAK INTO A PIPING SYSTEM AGAIN

- Designed to quickly and efficiently perform leak checks and tests on new and existing piping systems without having to “break” into the system.
- Reduces risk by verifying leak free systems as a result of an out-of-gas call or interruption in service.
- Simple and easy to use – no special tools required.
- Works with existing Rego – “Ready to Go” service valves on tanks and cylinders.
- Easily retrofits to existing piping systems.
- Simplifies the initial pressure test and low pressure leak test for pipe and tubing systems.
- Reduces time on site by connecting to piping systems in a fraction of the time as compared to traditional methods.
- Allows for easy set-up and troubleshooting of regulators in piping systems.

PRESSURE TAP FITTING

The patented, Presto-Tap LDS2000 pressure tap fitting is designed to easily obtain pressure readings and perform leak testing without ever having to break into the system.
