

# DIVERSCO... A COMPANY PROMOTING PROPANE SAFETY

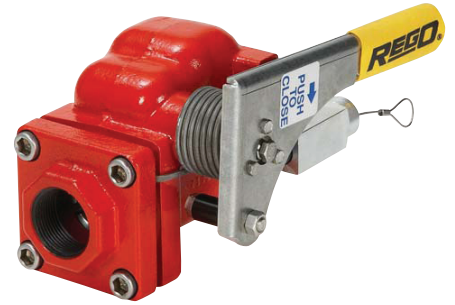

*Diversco Supply believes in and promotes propane safety through providing best-in-class safety products that help reduce safety risk factors*

**D**iversco Supply takes propane safety of their customers to heart and is proud to provide the best and safest products on the market. Diversco is committed to making their customer's world a safer place to work. Two great examples of Diversco's featured safety product lines are RegO's ESV valves and Smart-Hose Technologies' Smart-Hose Safety Systems.

RegO emergency shut off valves (ESV) provides exceptional flow rates at minimal differential pressure, convenience of installation and operation, combined with reliable service and security. RegO's exclusive 10 year warranty ensures that propane plants and facilities maintain peace-of-mind confidence with longest warranty safety valves available. RegO ESV may be operated manually or automatically with pneumatic actuators, which also carry the exclusive 10 year warranty. Release of the control system pressure for any reason closes the ESV for a fail-safe operation. Loss of

any pressure from the control line, caused by an accidents or line melting from fire, automatically shuts down the liquid and vapour ESV.

Smart-Hose Technologies' Smart-Hose Safety System has become a standard safety product in LPG industry plants. It is an added layer of safety to transfer operations of LPG products, bringing "Safety" to a whole new level. Smart-Hose assemblies are engineered design, CSA approved hose assembly, complete with a safety valve integrated in each hose-end fitting. If a hose assembly experiences a failure, the Smart-Hose Safety System is designed to instantaneously shut off the flow in both directions. Designed as a passive safety device, the Smart-Hose Safety System needs no human intervention to activate. A Smart-Hose Safety System when integrated into an LPG/Propane transfer hose assemblies, is designed to meet the most rugged applications found in the LPG/Propane Industry.

These two products make the Canadian LPG Industry a safer place to operate in and are only two of many safety products offered to Diversco Supply's customers. Providing these types of products to their customer base gives Diversco great satisfaction and peace of mind in knowing that the products are designed and built to provide safe installations. For more information on these products or any other safety products, please contact any of Diversco's main branches below or visit their website at [www.diverscosupply.com](http://www.diverscosupply.com).
